

Contractor Non-Disruption Rule

From time to time licensed contractors under contract with the Association perform construction and/or maintenance activities within Fieldstone. Advance notice of these activities is provided on the bulletin board at the pool, and/or through email notifications. Any member is invited to ask questions relative to the construction and/or maintenance work with any Board member. Direct communication by the homeowner with the contractor to impede, redirect, prohibit, or harass any contractor is prohibited. A homeowner who interferes with a contractor performing work under a legally noticed and executed contract through the Association may be subject to disciplinary action including monetary fines.
